PROPOSAL

PREPARED FOR EXPONENTIAL NETWORK

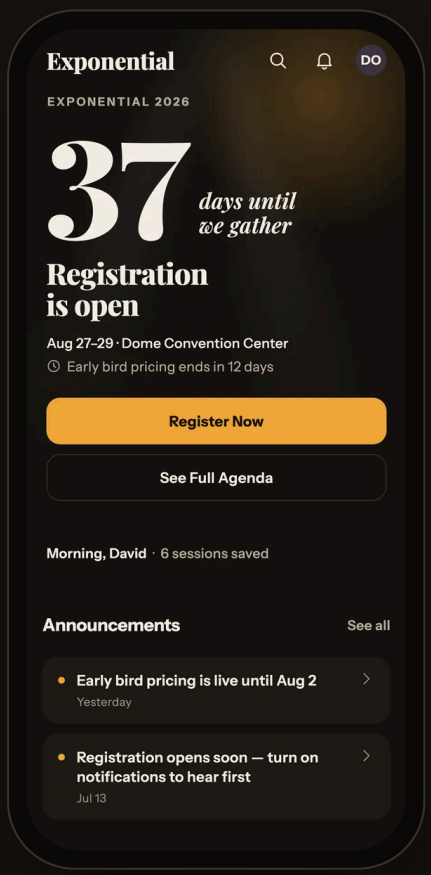

Your conference and community, in *your own* app.

Church 360 gives Exponential an app on iPhone and Android, carrying your name and look, and a back office where your team runs every event. Registration, tickets, check-in, live sessions, replays, community and announcements all live in one place.

FOR
Exponential leadership team

FROM
Henry Duke, Vue Ezy

DATE
November 2026

WHY THIS MATTERS

One home for everything around your gatherings

Most ministries run events with a handful of tools that don't talk to each other. The team spends its energy joining them up, and members get a different experience at every step.

TODAY

Spread across many tools

- ✕ **Registration** on a web form, then a spreadsheet to tidy.
- ✕ **Payments** by bank transfer, matched up by hand.
- ✕ **Updates** in several WhatsApp groups that people mute.
- ✕ **Livestream and Zoom links** shared in messages and lost.
- ✕ **Check-in** from a printed list at the gate.
- ✕ **After the event**, the connection fades until next year.

WITH CHURCH 360

One app, one back office

- ✓ **Register and pay in the app**, in naira or dollars.
- ✓ **Payments reconcile themselves**: every ticket shows paid, due or refunded.
- ✓ **Announcements and push notifications** that reach the right people.
- ✓ **One Watch Live button** that opens the stream inside the app.
- ✓ **QR tickets** scanned at the gate with a phone.
- ✓ **Community spaces and replays** that keep people engaged all year.

HOW IT WORKS

Three parts, one system

Your team works in the back office. Members use the app. Church 360 sits between them, keeps everything in step, and is run for you by Vue Ezy.

YOUR TEAM

Back office

A website your staff sign in to. Create events, set prices, publish the agenda, approve registrations, scan tickets, post announcements and see the numbers.

↓

RUN BY VUE EZY

Church 360 platform

Secure cloud servers that hold your events, members, tickets and payments. Every change your team makes reaches the app straight away. We host it, back it up, update it and watch over it.

↓

YOUR MEMBERS

The Exponential app

On the App Store and Google Play under your name and logo. Members register, carry their ticket, follow the agenda, watch live, join conversations and catch replays.

Payments

Paystack, Flutterwave or Stripe, using your own accounts. Money goes straight to you.

Livestreams

YouTube, Vimeo or a streaming link play inside the app. Zoom works too: see the FAQ.

Notifications

Push notifications to phones, plus an inbox in the app so nothing is missed.

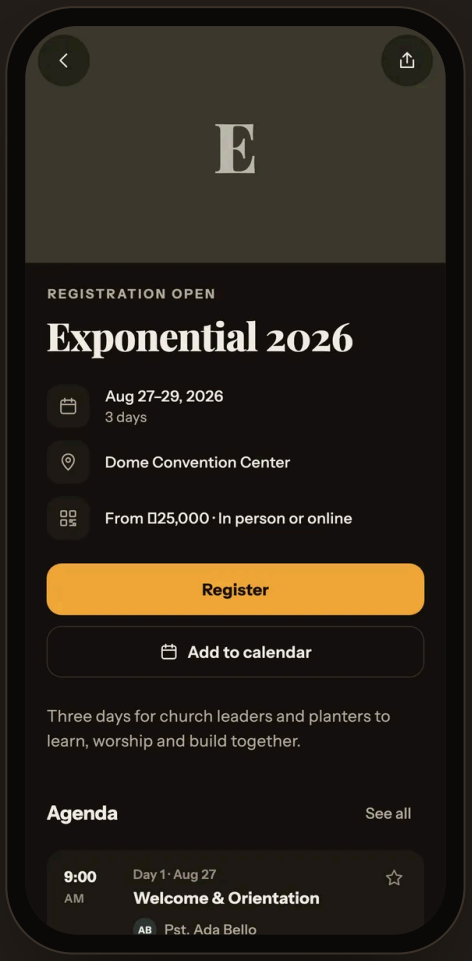

ONE EVENT, START TO FINISH

Exponential Conference 2027, through the app

The app changes with the calendar. Months before, it counts down and sells tickets. On the day, it shows what is happening now. Afterwards, it hands people the replays and keeps the conversation going.

Before

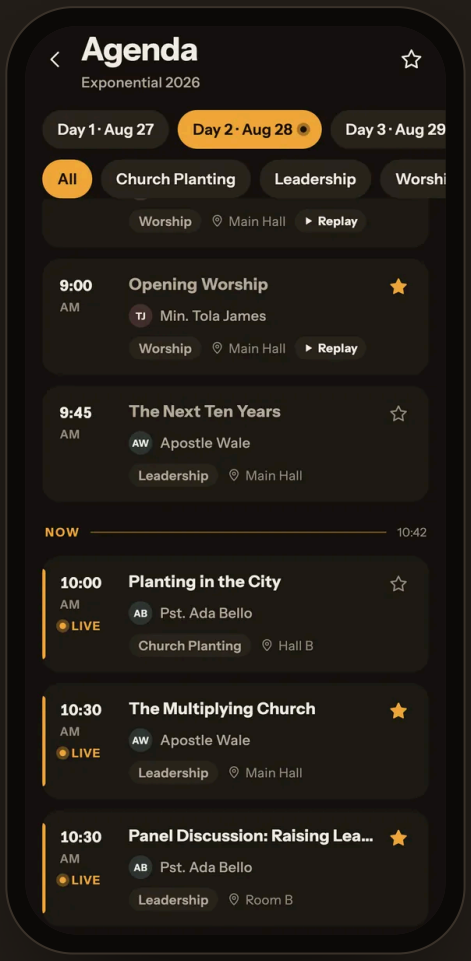

Register and get ready

1. **Announce** the event. Its page shows dates, venue, prices and speakers.
2. **Register** in a few taps, choosing in person or online.
3. **Pay** in naira or dollars, or wait for approval if you review requests.
4. **Get a QR ticket**, for one person or a whole group.

During

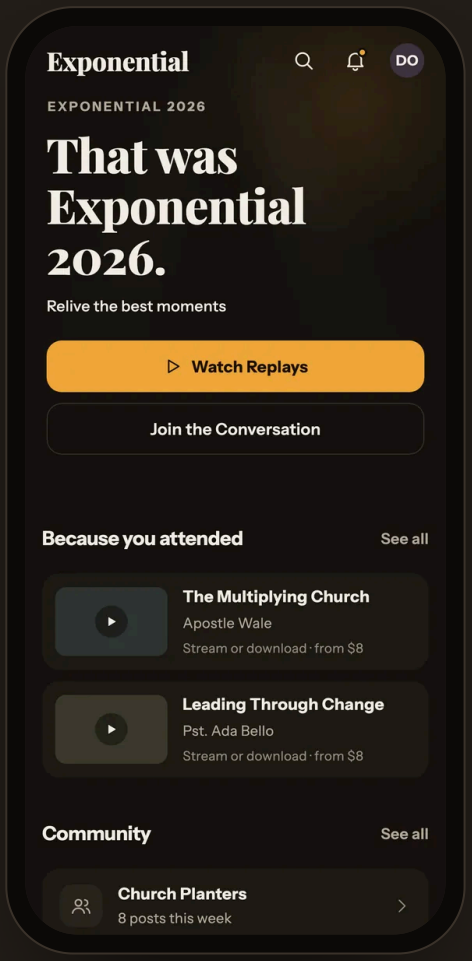

Arrive, follow and watch

1. **Check in** at the gate with one scan.
2. **Follow the agenda**, with what's on now marked live.
3. **Build My Agenda** by starring sessions, and get a reminder before each one.
4. **Watch Live** inside the app from anywhere.

After

Relive and stay connected

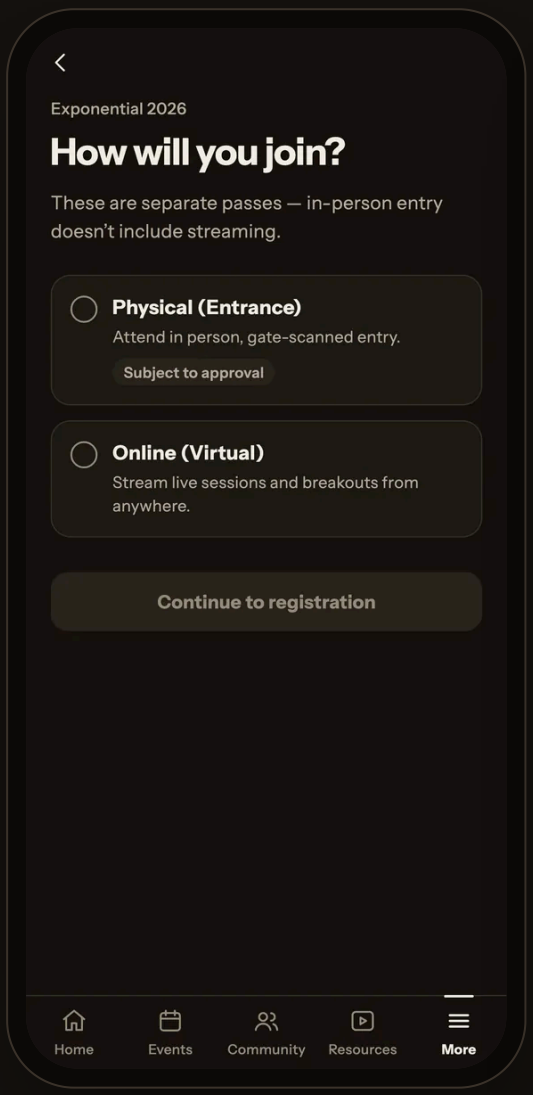

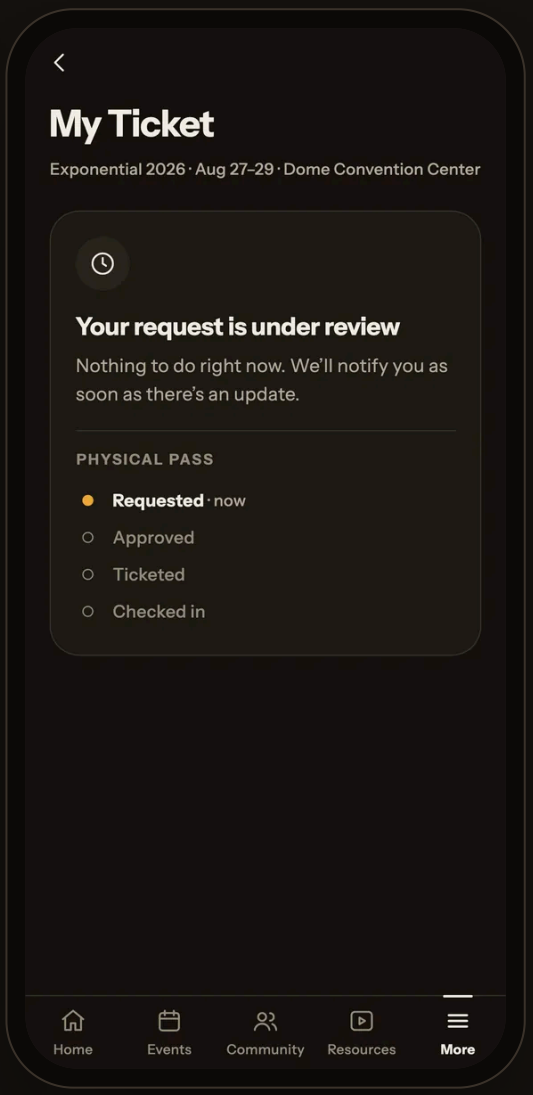

1. **Watch replays** for as long as you choose.
2. **Rate the sessions** with stars and a comment.
3. **Keep talking** in community spaces.
4. **Save the date**: the app starts counting down to next year.

FEATURES

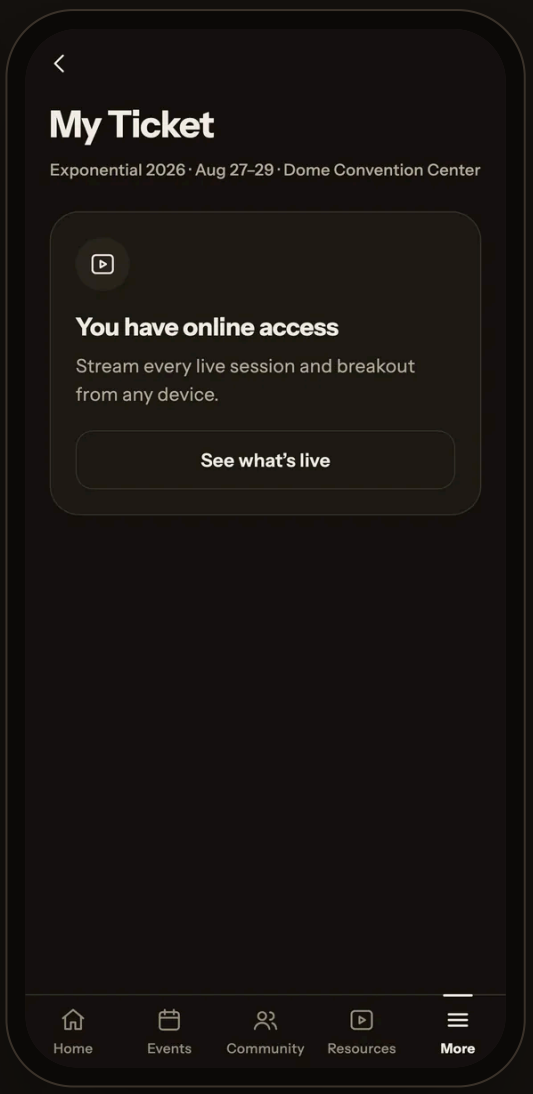

What the app does, and what it means for you

Each feature below shows the screen, what it does, the benefit to your team and members, and an example of it in use. Screens show sample data.

BEYOND THE CONFERENCE

Zoom webinars that keep the network growing all year

The flagship conference happens once a year. Masterclasses, leadership webinars and online cohorts on Zoom can carry the same energy through the other eleven months. Church 360 runs them as events in the same app, so they get the same registration, reminders, replays and community as the conference.

A year with Exponential, not just three days

One way webinars and the conference can feed each other. Your team sets the rhythm.

EARLY IN THE YEAR

Masterclass webinars

Monthly teaching on Zoom for pastors and leaders. Each one introduces conference speakers and themes, and points people to registration.

RUN-UP

Pre-conference sessions

Orientation for first-timers, briefings for church teams and volunteers, and early-bird reminders to the people already engaged.

THE CONFERENCE

In person and online

The flagship event at the venue, with online passes for those who can't travel, watching live in the same app.

AFTER

Follow-up cohorts

Webinar series that go deeper on conference tracks, with a community space for each group between sessions.

What webinars add to the flagship conference

A bigger audience

Leaders who can't travel to Lagos, or can't afford to, still join the Exponential network from wherever they serve.

More registrations

People who enjoyed a free masterclass are already in the app when conference registration opens, and hear about it first.

Income between conferences

Paid masterclasses and online cohorts, with tickets and payments handled the same way as the conference.

Teaching that lasts

Every webinar becomes a replay members can return to, building a library of Exponential teaching over the years.

A real relationship

Regular contact all year instead of one weekend, so the network grows closer, not just bigger.

Better planning

Ratings and attendance from each webinar show which topics and speakers people want at the next conference.

One place for members

The same app, login and ticket wallet for webinars and the conference. Nothing new to learn.

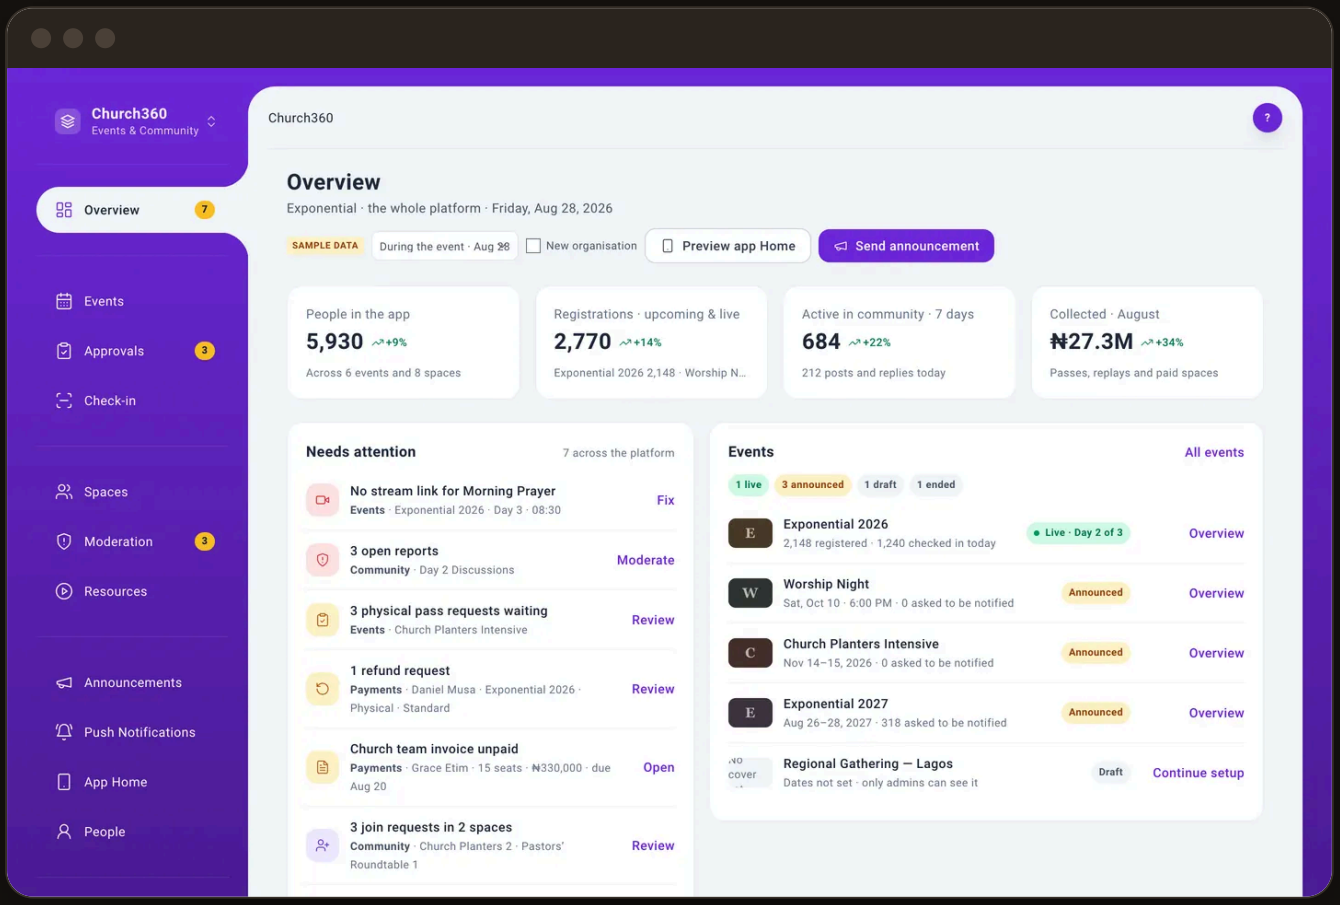

Less work for your team

No separate sign-up forms, email lists or link-sharing for each webinar. Set it up once in the back office.

THE BACK OFFICE

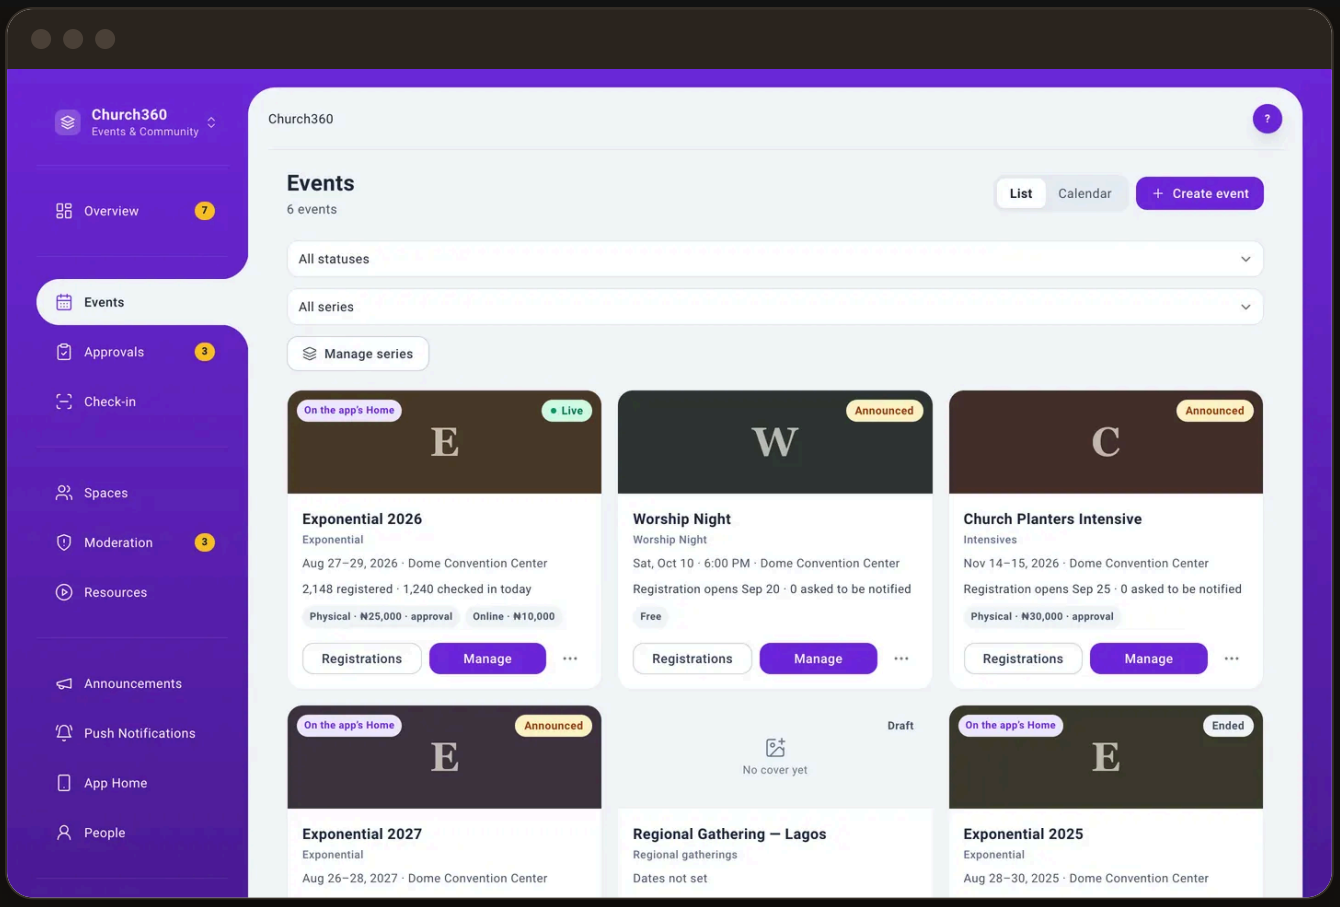

Where your team runs it all

A website your staff sign in to from any computer. No technical skills needed. Each person gets only the access their role needs.

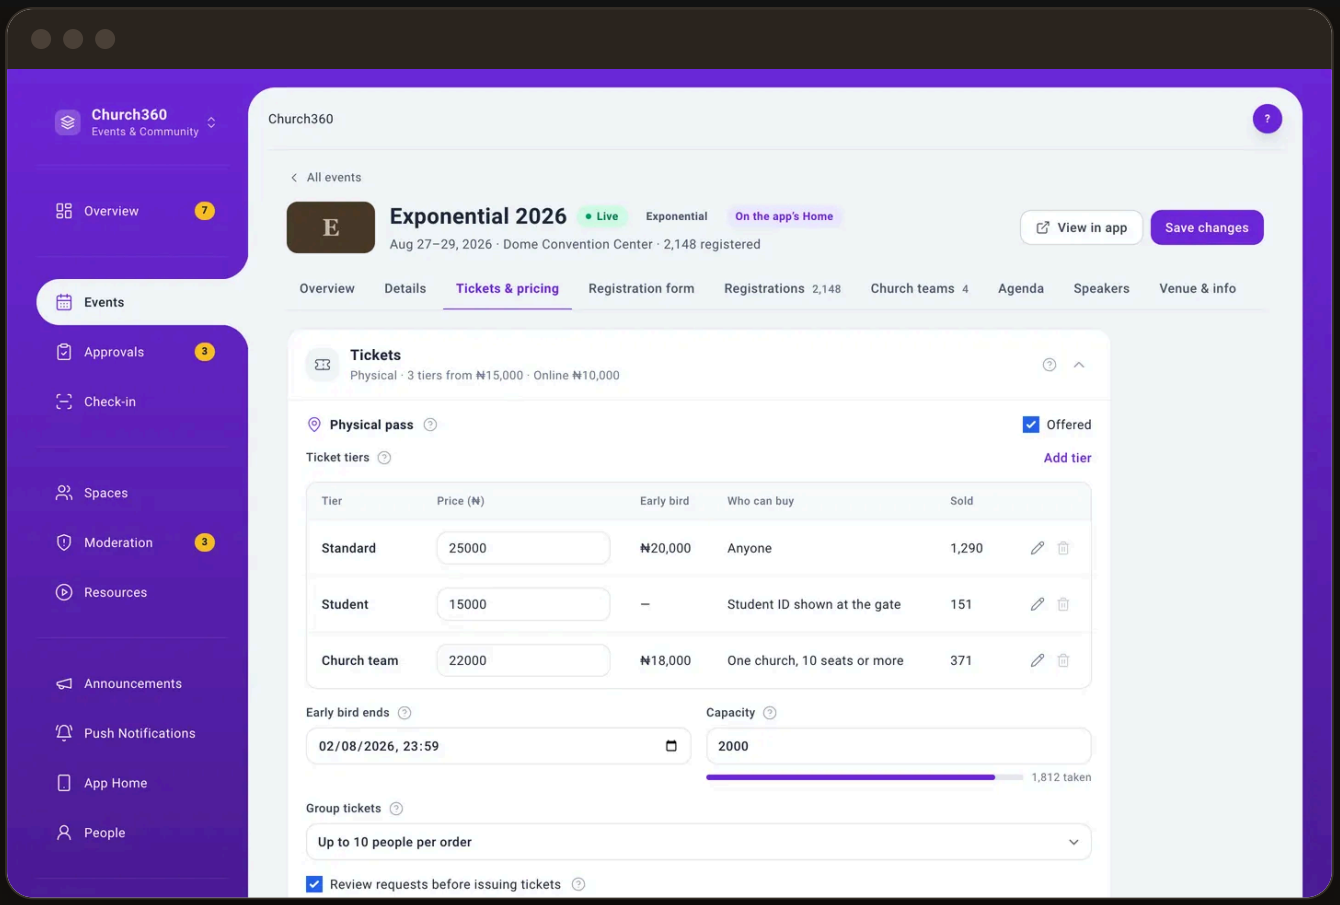

Overview

Today's numbers and anything waiting on your team, such as approvals, reports and refunds.

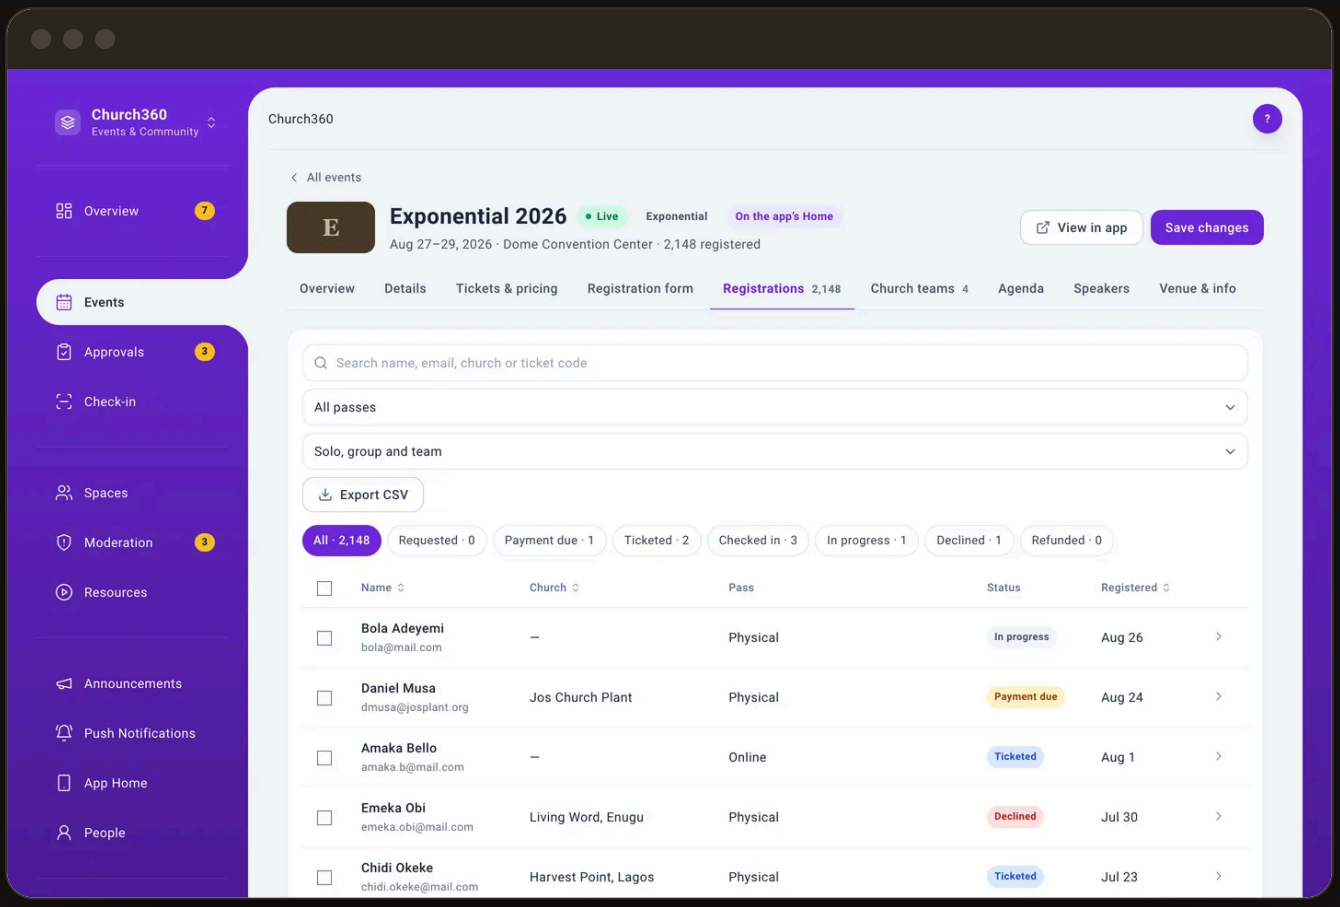

Events

Every event in one place, with its own series, cover image, status and registrations.

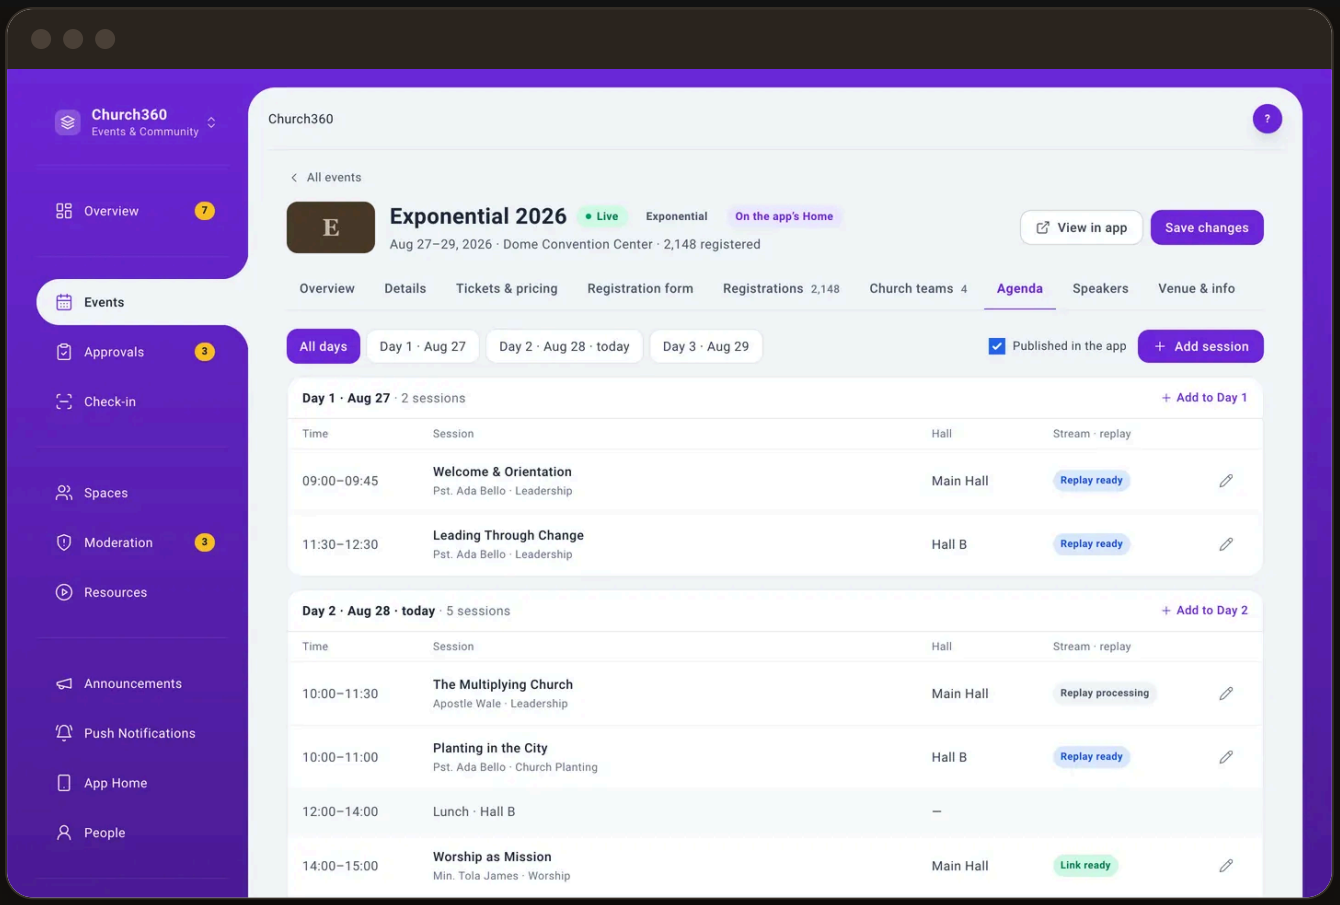

Tickets & pricing

Passes, tiers, early-bird prices, capacity, group sizes and currencies.

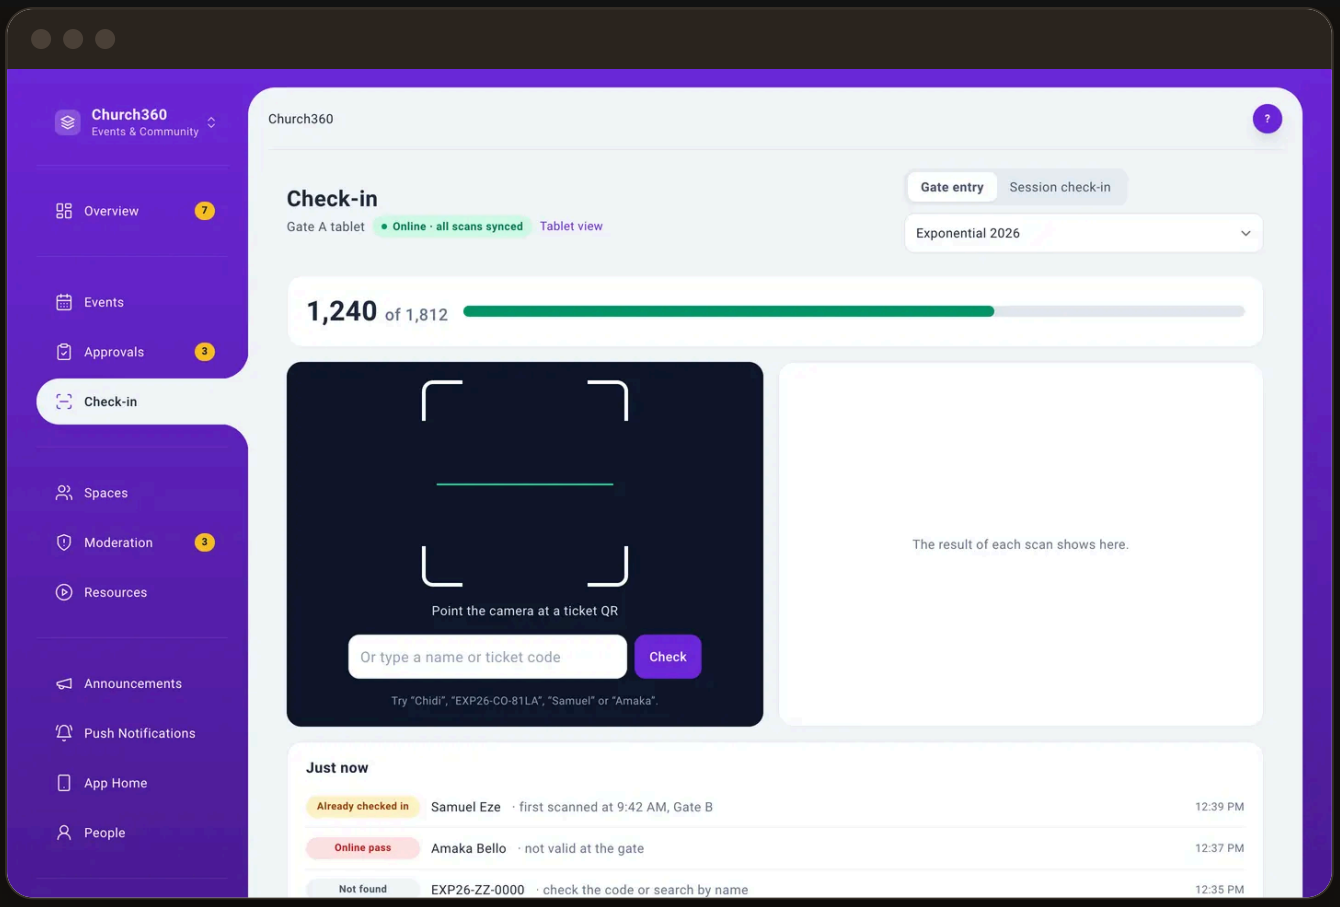

Registrations

Everyone who signed up, with status, payment and church. Export to a spreadsheet.

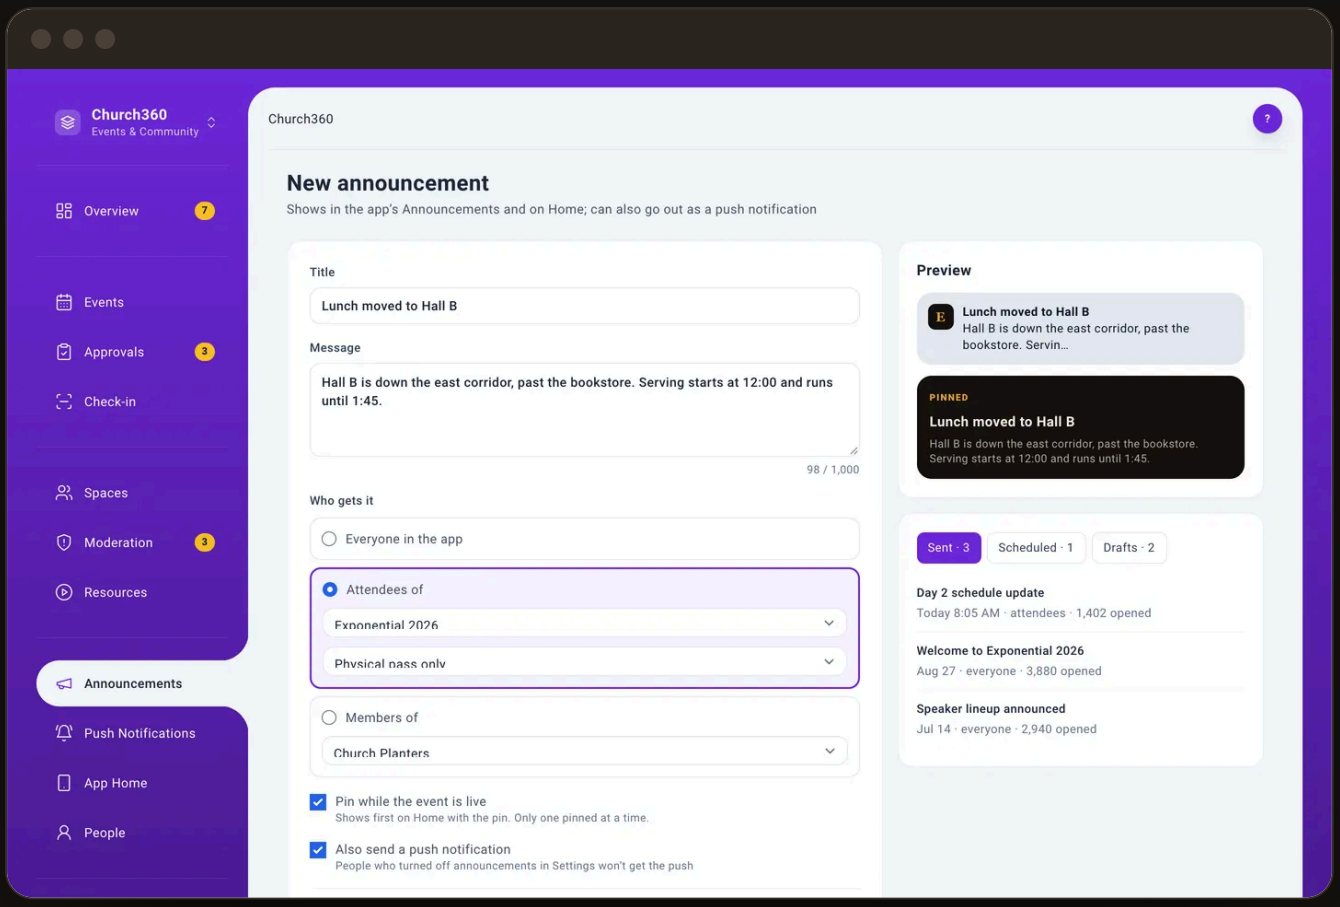

Agenda

Build each day's sessions with halls, tracks, speakers, live links and replays.

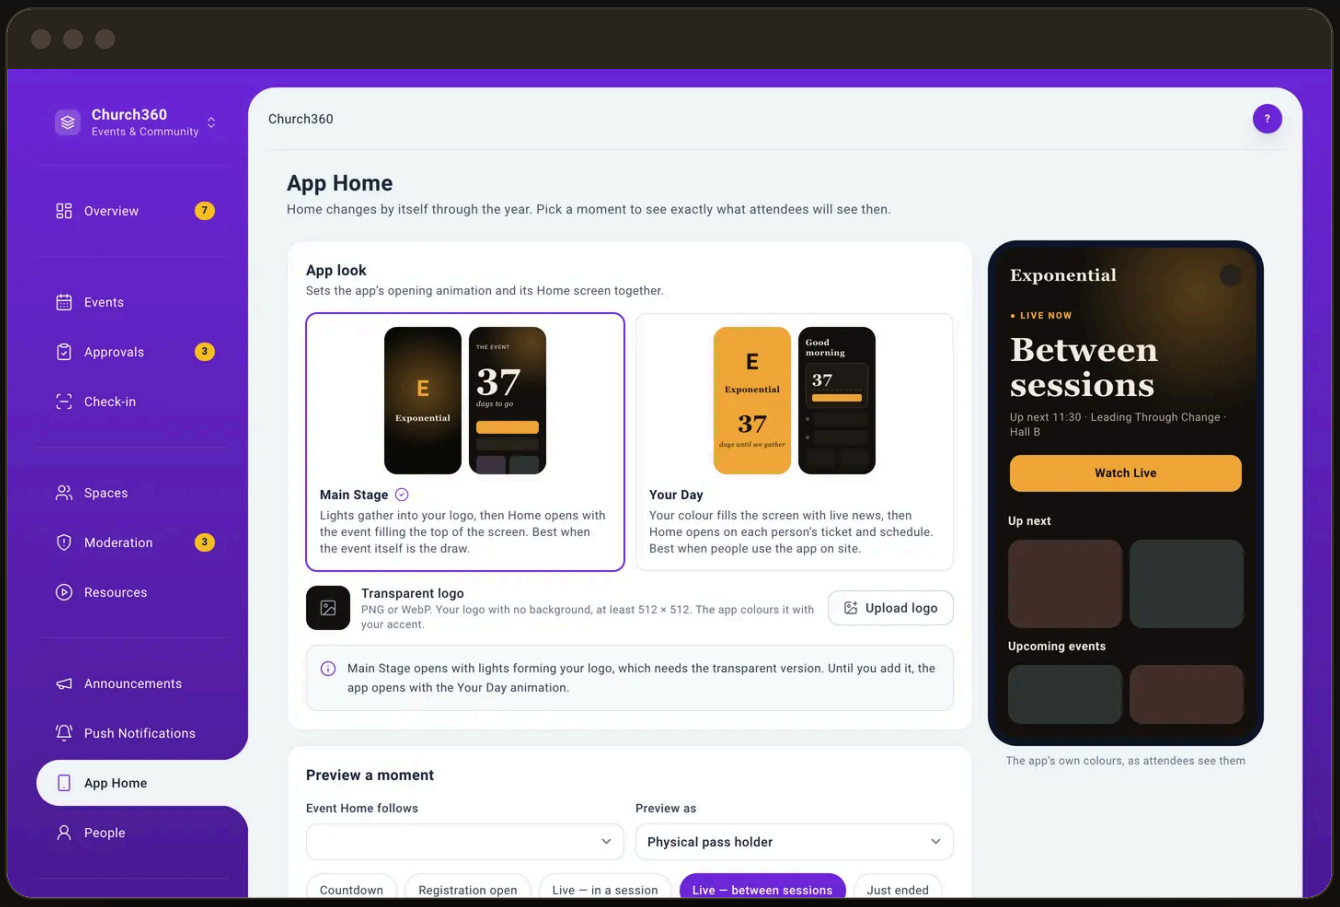

Check-in

Scan QR tickets with the camera or search a name, and watch the count rise.

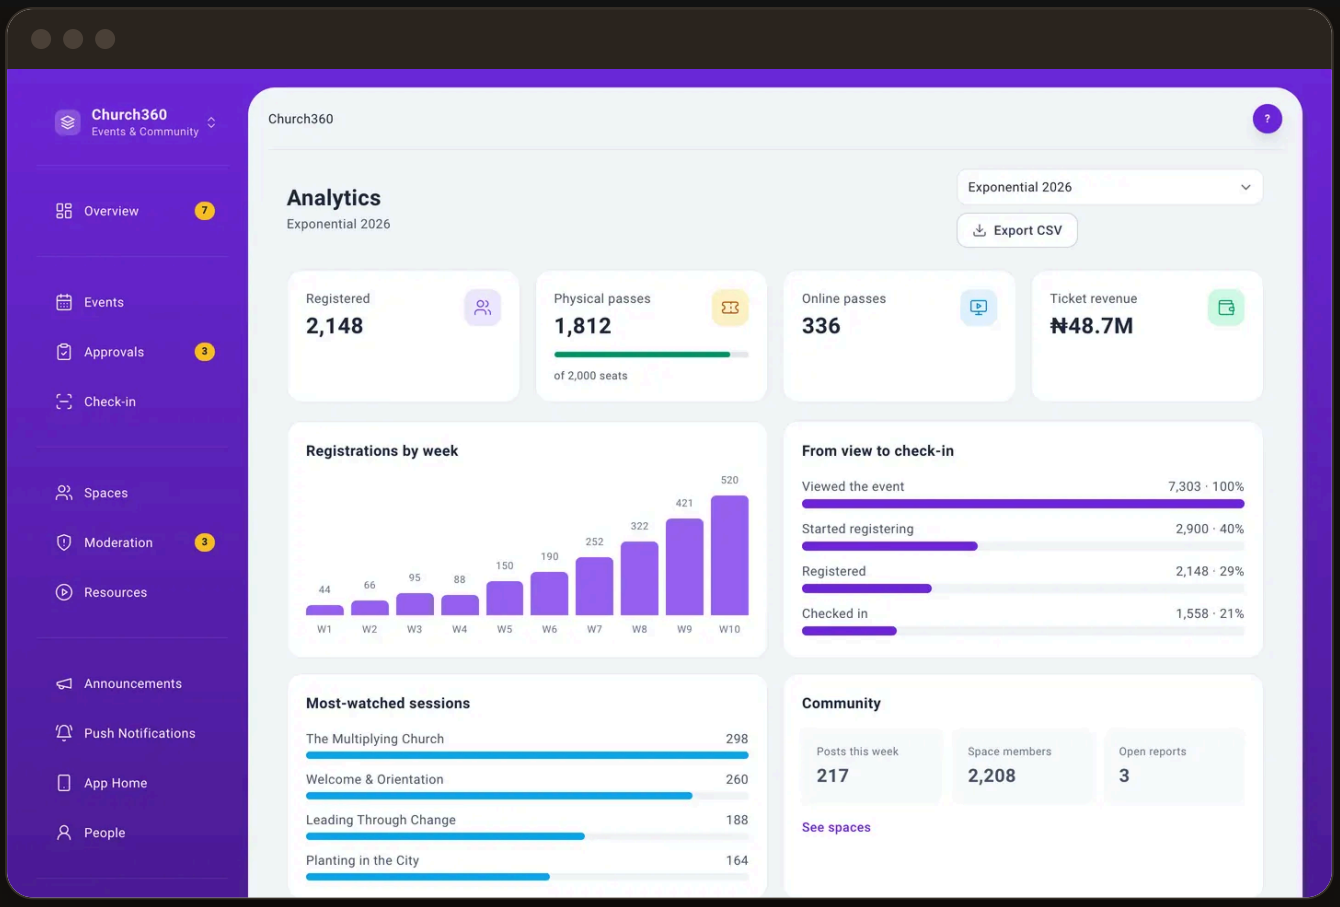

Announcements

Write once, pick the audience, preview it, and send it as a push notification.

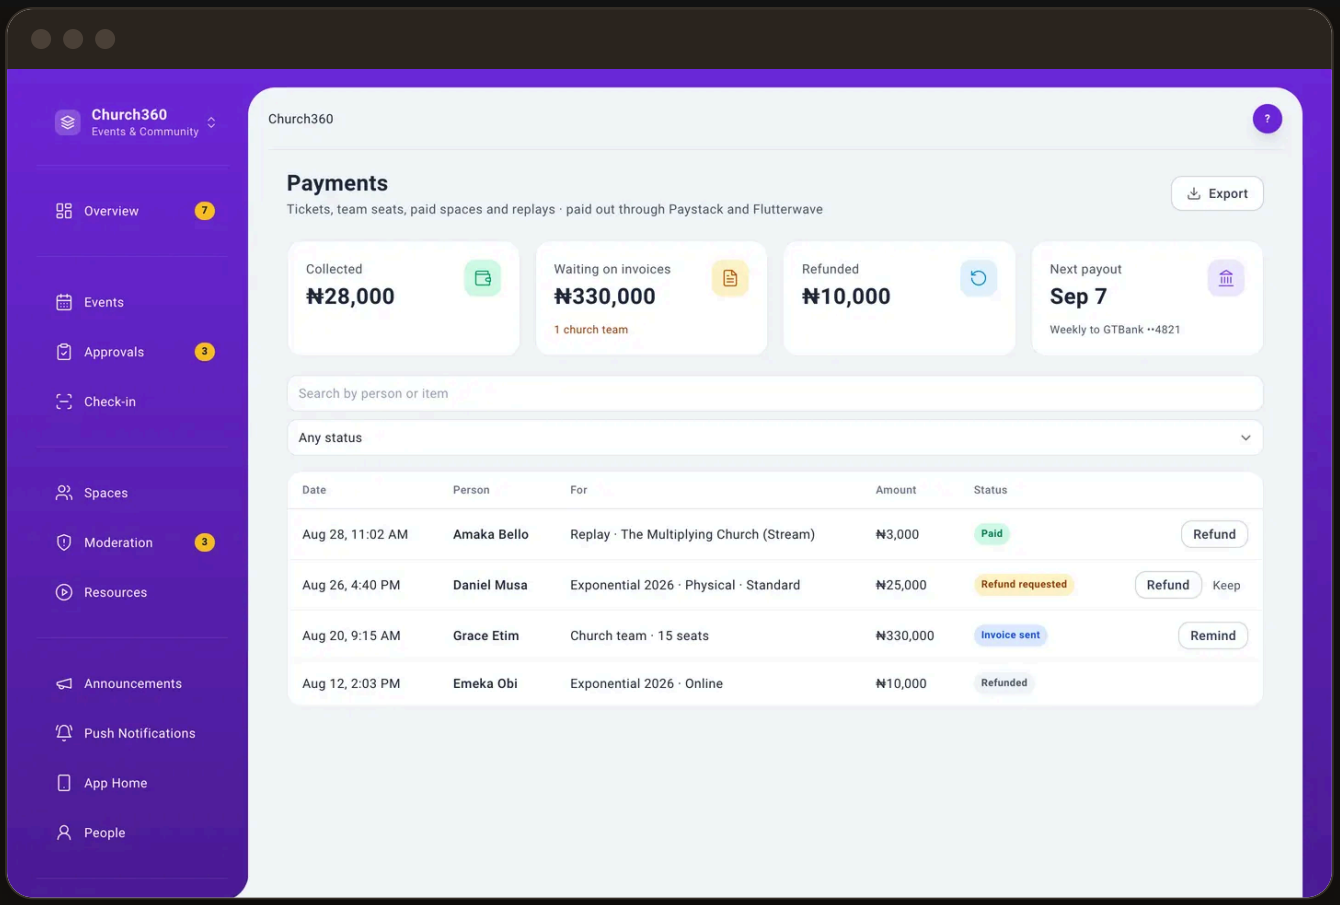

App Home

Choose the app's look and preview the Home screen at every stage of an event.

Analytics

Registrations by week, from view to check-in, most-watched sessions and community activity.

Payments

Every payment, refund and payout, by event and currency.

BENEFITS

What each group gains

LEADERSHIP

A clear view and a stronger brand

- Your own app, under your name, in both stores.
- Attendance, revenue and engagement in one dashboard.
- A year-round relationship with your network.

EVENTS TEAM

Less admin, fewer surprises

- Registrations, payments and tickets in one list.
- Change the agenda once and everyone sees it.
- Fast check-in with phones at the gate.

FINANCE

Money you can trace

- Payments go straight into your own gateway account.
- Every ticket shows paid, due or refunded.
- Naira and dollar prices, set by you.

MEMBERS

Everything in one place

- Register, pay and carry their ticket in the app.
- Watch live and catch replays without hunting for links.
- Stay connected with the people they meet.

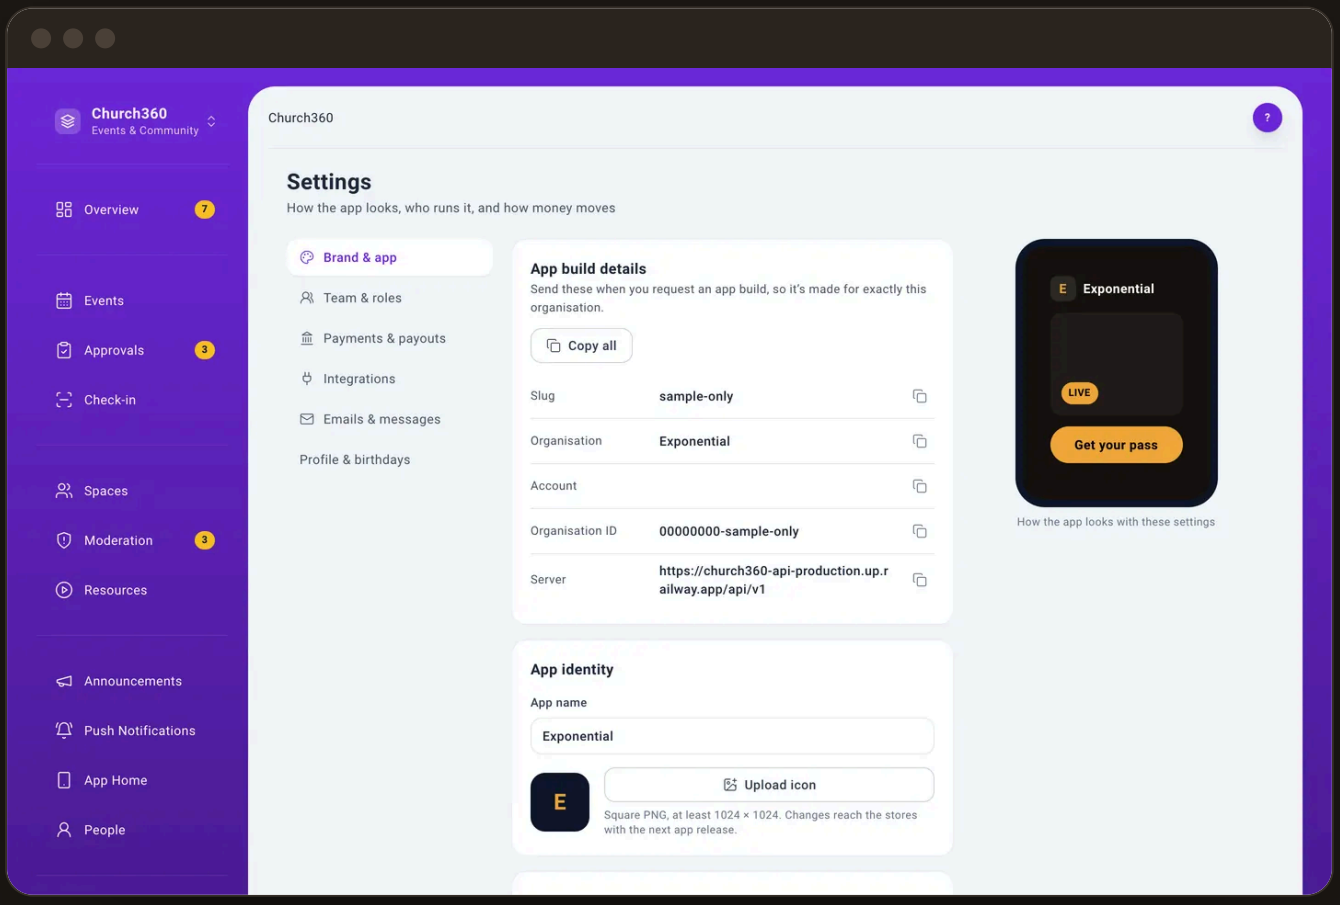

YOUR BRAND

It's the Exponential app, not ours

Members download an app called Exponential, with your logo, your colours and your words. Church 360 works quietly underneath.

- ✓ **App name and icon** on members' phones.
- ✓ **Opening splash screen** in your design.
- ✓ **Colours and Home look** chosen in the back office.
- ✓ **Store listings** with your name, description and screenshots.
- ✓ **Your words** in every announcement and page.
- ✓ **Your quick links** to your website, giving page and help chat.

The only mention of us is a small "built on Church 360" line in the app's More tab.

SECURITY & PRIVACY

Your members' data, handled with care

You own the data

Your members, registrations and payments belong to Exponential. Export them to a spreadsheet at any time.

Card details stay with the bank

Payments are taken on Paystack's, Flutterwave's or Stripe's secure pages. Card numbers never reach our servers.

Access by role

Each staff member sees only what their role allows. Members' contact details are visible only to your team.

Members stay in control

They choose whether to appear in the directory and who can message them, can block and report, and can delete their account in the app.

GETTING STARTED

From yes to launch in about four weeks

A typical timeline. Apple and Google set their own review times, usually a few days.

WEEK 1

Kick-off and branding

We agree the plan, collect your logo, colours and app name, and set up your back office and team accounts.

WEEK 2

Your content

Together we add your first event, prices, agenda, speakers and quick links, and connect your payment account.

WEEK 3

App store publishing

We build your branded app and submit it to the App Store and Google Play. Your team tests it first.

WEEK 4

Training and launch

We train your team, then you announce the app to your network. We stay close through your first event.

WHO DOES WHAT

We run the technology. You run the ministry.

TASK	WHO	WHAT IT INVOLVES
Hosting, backups and security	Vue Ezy	Servers, data backups, security patches and monitoring.
App updates and store publishing	Vue Ezy	New versions of your app for new phones and new features, submitted to Apple and Google for you.
Fixing problems	Vue Ezy	Anything not working as it should is ours to fix, at no extra cost.
Technical support	Vue Ezy	Help for your team by email, with priority during your events.
Events, agenda, speakers and announcements	Your team	Your content, added and updated in the back office. We help you set up the first event.
Approvals, check-in and moderation	Your team	Deciding on requests, scanning tickets and looking after your community spaces.
Payment gateway account	Together	You open the account so money goes straight to you. We connect it and test it with you.
Livestream	Together	Your media team streams to YouTube, Vimeo or Zoom. We make sure it plays in the app.

FAQ

Questions leaders usually ask

HOSTING, COST AND SUPPORT

Can the app be hosted on our own server?

No. Church 360 is a managed service that Vue Ezy hosts and runs for you. This is deliberate, and it works in your favour:

- Security updates and fixes reach you the same day, without your team doing anything.
- Your app keeps working as Apple, Google and phone makers change their rules.
- You don't need servers, a technical team or out-of-hours cover.

Your data is still yours. You can export members, registrations and payments at any time, and if you ever leave we hand over a full export.

What does it cost, including setup and ongoing maintenance?

There is a **one-time setup fee** to build, brand and publish your app and set up your team, then an **ongoing plan** that covers hosting, maintenance, updates and support. We'll send a quote based on your events and needs.

Payment gateways such as Paystack, Flutterwave and Stripe charge their own small fee on each payment.

Who is responsible for updates, maintenance and technical support?

Vue Ezy. We host the platform, keep it secure, release updates to the app and back office, publish new versions to the App Store and Google Play, and support your team. Your team looks after your content: events, agenda, announcements and approvals. See Who does what.

BRANDING AND FEATURES

Will the app carry our name, logo and identity?

Yes. The app is called Exponential, with your icon, splash screen, colours and store listing. Members never need to know Church 360 exists, apart from a small "built on Church 360" line in the More tab. See Your brand.

What exactly can the app do?

- **Events:** event pages, registration, your own questions, approvals, group tickets, early-bird prices.
- **Payments:** naira and dollars through Paystack, Flutterwave or Stripe.
- **Tickets:** QR tickets, online passes, check-in at the gate.
- **Programme:** agenda, My Agenda with reminders, speakers, venue information.
- **Live:** livestreams and replays inside the app, Zoom for speaking.
- **Community:** spaces, materials, directory, messages, moderation.
- **Communication:** announcements, push notifications, birthday wishes.
- **Members:** profiles, feedback, in-app pages and live chat, search, resources.
- **Back office:** analytics, people, payments, branding and team roles.

Each is shown in Features.

How can people attend webinars inside the app without being sent to another app?

Watching happens inside the app today. Stream the session to YouTube, Vimeo or a streaming service, add the link in the back office, and members tap Watch Live to watch in the app's own player.

For Zoom webinars, Zoom has a built-in setting to stream a meeting live to YouTube. Members then watch the webinar inside the app. Only those who need to speak or present tap "Join on Zoom to speak", which opens Zoom.

Fully inside the app, with camera and microphone, is possible using Zoom's own toolkit for apps. We offer it as an optional add-on, priced separately, for churches that need two-way meetings without leaving the app.

PRACTICAL QUESTIONS

Does it work on both iPhone and Android?

Yes. The same app is published to the App Store and Google Play, and it also runs on iPad. Your team uses the back office in any web browser.

Is it only for big conferences?

No. Run as many events as you like: the annual conference, regional gatherings, worship nights, masterclasses and intensives. Each has its own page, tickets and agenda, and you can group them into series.

Where does the money go when people pay?

Straight into your own Paystack, Flutterwave or Stripe account. Vue Ezy never holds your money. You set every price yourself, in naira and in dollars.

What if a member doesn't want to install an app?

Your team can register them from the back office and send their ticket, and the gate can check them in by name. If you'd rather keep registration on your website, the app can link to it instead.

How long until we're live?

About four weeks from kick-off to launch, including Apple and Google review. See Getting started.

What happens to our data if we stop?

We give you a full export of your members, registrations and payments, and then delete your data from our servers on your request.

NEXT STEPS

See it working with your own event

We'd be glad to walk your team through a live demo, or put the test version of the Exponential app on your phones so you can try it yourselves.
